ABOUT FRANZ VIEGENER

Franz Viegenger is a modern amalgam of South American passion and German engineering. Renowned for its uncompromising quality, Franz Viegenger produces a curated selection of sculptural bath and kitchen fittings that synthesize architecture, geometric forms and fluidity. Drawing from 100 years of experience in the industry, Franz Viegenger launched its North American brand in 2013, and has quickly achieved a best-in-class level of expertise and quality. A dedicated facility within the company's 800,000 square-foot state-of-the-art complex in Buenos Aires draws upon the brand's finest European engineering and master South American artisans to create Franz Viegenger's unique and exceptional handcrafted products.

The Products

Franz Viegenger's collections are a high-end, meticulously crafted and engineered portfolio of bath and kitchen fittings with products that are contemporary, authentic and pure. A select group of engineers and designers within the factory were chosen to focus on creating these bold, timeless and stylish designs with the functionality demanded by the discerning North American consumer. Each distinct collection is a fusion of the cultural and historical South American surroundings in which the brand thrives, together with the discipline and engineering prowess of the Viegenger family. The products have won a number of prestigious, international awards including GOOD DESIGN® award and "Best in Show" at the International Contemporary Furniture Fair (ICFF) — both of which were earned multiple years in a row. Franz Viegenger bath collections are specified and sourced by leading architects and designers, and installations include showcase residences and premier hospitality properties, internationally. These luxury products exceed the standards of designers and architects worldwide. Every piece that comes out of the factory is painstakingly machined, polished, assembled and tested. The products are then packaged with utmost care to ensure that upon arrival the products reveal themselves immediately.

GLOBAL REFERENCES
